

SUMMER 2008

Voice of the Voiceless presents:

FLASHPOINT

Volume II: LAB ANIMAL BREEDERS

Names and addresses of animal exploiters

The Problem:
Over 20 million animals are
butchered annually under
the guise of "science."

The Culprits:
The majority of animals
killed in laboratories each
year are sourced from the
locations listed here.

The Solution:
...starts with you.

Each year these companies are
guilty in the deaths of over
20 million animals behind the
doors of U.S. laboratories.

FLASH

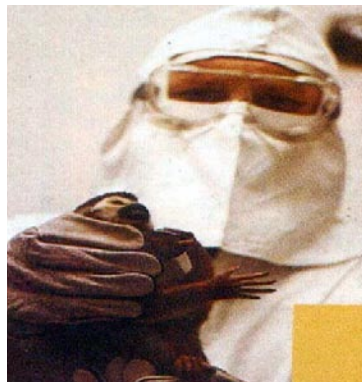

POINT

These facilities breed and sell animals to
be killed in U.S. laboratories. Every year,
these companies breed and transport
millions of mice, rats, amphibians, dogs,
cats, rabbits, and dozens of other species
to die at the hands of the bloodthirsty
butchers in the biomedical research
industry. These companies represent
crucial points in the vivisection industry
infrastructure.

In some cases, the addresses listed may
be an office / headquarters address, and
not the breeding facility. The address given
will serve as a starting point in identifying
the location of the animals.

Volume II:

LAB ANIMAL BREEDERS

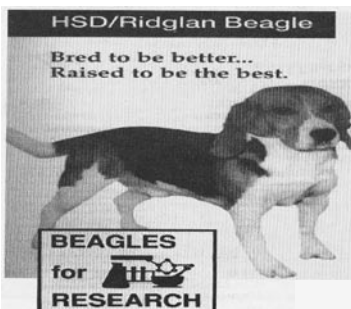

Over 10 billion animals are killed annually for "food" and "science", and it is the obligation of all of us to expose these horrors. The Voice of the Voiceless (.org) *Flashpoint* volumes are presented to address a simple fact: animal abuse industries owe their existence to their secrecy. In giving animal exploitation an exact physical location, the abstraction is removed and we are confronted with the duty that comes from living amidst a modern day Holocaust.

Knowledge bears responsibility.
